## About me

---

My name is Vass Krisztian Patrick. My nickname is Kristo. I was born on the 22nd of July 1997. My passion is video games, everything from playing them to creating them.

Been working on small games using Unity and RPG Maker and recently started creating personal websites to learn and accumulate experience in Web Developing.

I sometimes mod games like Halo MCC in which I change and play with certain values like bullet velocity, bullet spread or change the behavior of certain objects in the game (like making a biped a functional vehicle that shoots random objects for example)

I'm also a part-time streamer at [twitch.tv/kristorails](https://twitch.tv/kristorails) and a twitch affiliate.
